

Sebastopol resident for 34 years. Director of the EMF Safety Network. California Public Utilities Commission (CPUC) Intervenor. Prior to this I created and sold ceramic artwork to specialty gift shops across the US.

In my work as director of a nonprofit project I interact with many different people and groups. I understand community organizing and value the range of people's viewpoints.

The fire department, the unhoused, and the smart water meters are important current issues. I believe inclusivity of public opinion is essential to solving these and other community challenges.

As a CPUC intervenor I have worked in a professional capacity with lawyers and legal documents. I am capable of participating in city decision making.

I will support Sebastopol's environmental policies. For example: the 2016 General Plan Community Health and Wellness Goals to minimize unsafe EMF's; the 2013 ordinance that banned smart meters for "matters of public health, safety and consumer protection..."; the ban on pesticides; Climate Action; and Zero Waste Policies.

I will advocate for the protection of people and children, give nature a voice, and work to preserve Sebastopol's "local flavor, global vision".

I am an artist, grandmother, gardener, and have a daily meditation practice.
